

001 Automotive Body & Mechanics

Gain the knowledge you will need to be a future driver and car owner. Learn about how cars are restored after an accident as well as how to diagnose problems with how your car operates.

002 Basic Auto Repair & Maintenance

Gain the knowledge you will need to be a future driver and car owner. Learn how to properly maintain a vehicle to insure longevity of your car. Discover the basics on tire care and prevention, changing automotive fluids to keep your car running smoothly, and automotive safety.

003 Building Trades (Week 1 Only)

Develop a basic understanding of diverse trades relevant to contracting, including basic electrical circuits, carpentry, and plumbing. Students will have the opportunity to use power tools to complete projects. Prerequisite: Students must be at least 14 years old.

004 Cosmetology

Expand your knowledge of hair, skin, and nails through the use of hairstyling techniques, facials, makeup applications, and manicures.

005 Crime & Accident Investigation

Understand basic techniques Law Enforcement officers use to investigate crimes and apprehend suspects. Learn to take fingerprints, read a compass, photograph a simulated crime scene, solve the crime, and make an arrest. Discover how these skills are also utilized in accident reconstruction.

006 Culinary Arts (Week 1 Only)

Explore the field of Culinary Arts while learning how to read a recipe, use culinary equipment, prepare simple menus, and develop your own recipe books. In addition, students will discover the techniques used in cake decorating by designing, baking, and decorating cakes of your own.

007 Drafting & Design

Develop basic drafting and design skills using AutoCAD and Google Sketch Up software. You will be designing your own house and a 3D model of the house.

008 Drone Discovery

Discover the exciting world of drone technology. Students will learn and explore the design, operation, and control of Quad Copter Drones. Learn how to setup, adjust, and fly your very own Quad Copter Drone. Participate in an obstacle course competition exploring your newfound skills.

009 Engineering Exploration & Design

Use your problem solving skills and examine fundamental engineering principles related to simple machines. Students will experience these principals in action through hands-on learning activities utilizing the K'NEX Education Intro to Simple Machines kit.

010 Sports Science & Conditioning

Explore the world of sports medicine and learn about the basic components of health, strength training, and nutrition. These life changing strategies could be the keys to athletic success and living strong.

011 Web Design (Week 1 Only)

Learn the current technology use in web applications. Develop basic web design skills to create dynamic websites.

012 Welding Technology

Discover basic welding techniques including MIG welding, brazing processes and oxyacetylene that can be used to design and create a unique paperweight. Prerequisite: Students must be at least 14 years old.
