

## Central Bucks Choral Program

### Guidelines for Instruction

**Face coverings:** All students will wear a mask in the choral setting. Students who elect to wear a face shield will also have to wear a mask for singing.

**Air Cycle Exchange:** The district FEMO department is planning to accelerate the air exchange in music rooms to optimize air exchange. This process exceeds recommendations for air cycle exchange in the choral setting. In addition, students will move to an alternate rehearsal setting after 30 minutes.

**Spacing:** Students will be spaced at a minimum of 6 feet for singing. Teachers will have access to large instructional spaces to allow for appropriate spacing.

**Materials:** Materials will not be shared in the choral classrooms. Rather, students will have their device or folder for access to singing repertoire. Students may bring a labeled water bottle to rehearsal or class.
