

Every Car Should Have Blue Tooth

By: Sean K.

Buzz! Buzz! Buzz! That is the sound of a phone ringing that fell between the gap of your car. Your looking for it. You are driving and there is a car in front of you. You look down and you find your phone but when you look up the car in front of you stops while yours is going. Crash! People should have Blue Tooth. Blue Tooth is a system in some cars were you can call people and people can call you. Blue Tooth is hands free. Blue Tooth is very different from a phone because on a phone you only have one hand on the wheel. But on Blue Tooth you have two hands on a wheel. Yes it is expensive, but it is keeping your family, friends, and yourself safe. Here are three reasons why. Blue Tooth prevents car crashes, bike accidents, and breaking of phones.

First, Blue Tooth prevents car crashes. When you're talking to a friend on Blue Tooth you can watch the road while you are talking to your friend. Another, reason is that Blue Tooth keeps you safe because when you are on a cell phone and your phone falls and you look down for only of couple of minutes you are about to hit a car. Also, when you have Blue Tooth instead of a phone Blue Tooth helps you have two hands on the wheel and when your on a phone most people put one hand on the wheel while they are talking on the phone and that could lead to a car crash. Like I said in the beginning it is pretty expensive but it is keeping your family, friends, and you safe from an accident.

Next, Blue Tooth prevents bike accidents. When you are talking on Blue Tooth it can help you pay attention to those bikers who are riding on the street. Another, job Blue Tooth dose is that when the bikers are on the street and you are talking Blue Tooth you can see when the bikers are stopping, turning, and going. Also, when you are on Blue Tooth and you see a biker in front of you the Blue Tooth will keep the biker safe. It will do that because if you have a phone and it falls you are looking for it. Finally once you find it you crash into a biker or car. Blue Tooth is defiantly more safer then talking or texting on a phone. I want to say that Blue Tooth is free but it isn't. Not everything in the world is free. Blue Tooth is very safe so I think the price should be lowered. Every car company should install a Blue Tooth for safety.

Finally, Blue Tooth prevents breaking of phones. When you are talking on a phone and you drop it there may be a crack in your phone or it might have broke. But when you are on Blue Tooth there is no crack in your phone. Another, reason is that when you are on a phone and you are careless and you have your window down and you drop your phone out the window it's the last time you will see that phone. With Blue Tooth you don't have to worry about a thing. Also, when you are talking on a cell phone and you drop and it hits a hard part of your car it will have taken off the screen of your phone and have several marks on the back of the phone. Blue Tooth and a iphone6 may be the same price. But Blue Tooth might be a little more expensive. I think Blue Tooth needs to be used more often because of the way it prevents car crashes and bike accidents. It is very safe for the people you love and care a lot about.

Now that you have Blue Tooth there is no more Buzz! Buzz! These reasons are why every car should have a Blue Tooth. Blue Tooth prevents car crashes, bike accidents, and breaking of phones. Blue Tooth is expensive but it is keeping you and your family safe from a little incident. All of you car

company's need to install Blue Tooth in every car you make. Do it now! If you don't I will come up to every single car company in Doylestown and tell you "**Install Blue Tooth now!**" So I think you car company's should do it now before I come up there. I want you company's to install Blue Tooth because I don't people to get in car crashes and I don't want people to get severely injured in a car crash or bike accident. Plus you car company's will make a lot of money if you put Blue Tooth into your car because technology itself is a lot of money. So that's why a car with technology will help you car company's get money. Get a car that has Blue Tooth and you will be safe!
