CERT Update

School Guardian System

Guardian: Having been approved by the CBSD Board of Directors, two major changes are coming to our front entrance. Beginning this June, the entire front entrance will be locked 24/7. Any visitors to Holicong must look into a new high definition camera, request entry and state business for the visit. This will allow entrance into our front vestibule, but not the office. Inside the vestibule, a kiosk will be installed. All visitors must insert their driver's license into the machine, which immediately populates a computer in the office with the person's information, including the presence of a criminal record, etc.. The computer then prints out a custom ID badge, including the visitor's name, date of visit, destination within the school and a photo. Once printed, entrance is granted. We realize this process is new and we will need to adjust, but it will create a safer environment at Holicong.

A faint, grayscale background image showing a person in a full-body hazmat suit, including a hood and gloves, standing next to a flag that features a yellow field with a black swastika and a blue field with white stars.
