

## Grade K: April 15, 2020

**Overview:** Addition by “Putting Together”

### Things to know:

1. Sit with mom, dad, grandparent or guardian, or your brother or sister to practice the activities for the day.
2. If you do not have the supplied worksheets or access to any of the worksheets, it is fine to create your own based off the supplied worksheets. Also, you do not have to print the worksheets, just put your name and date at the top and number the problems when you write your answers. You can use a regular piece of paper, that is fine.
3. More specific directions are provided on each sheet/activity that goes along with these lessons. I will send these sheets through email.

**Explanation:** You will use the addition strategy, “Putting Together” to help you learn how to add two numbers.

Tasks	Resources
1. <b>Calendar Math:</b> Complete today’s calendar activities.	Document: <b>Calendar Activities</b>
2. <b>Lesson Introduction:</b>	Watch the Seesaw instructional video about using the addition strategy of “Putting Together” to add numbers.
3. <b>Learn:</b>	Watch the instructional video about addition by using the addition strategy, “Putting together.”
4. <b>Try:</b> Complete the “Try” Activity	Watch a video for guidance and additional support while you complete the “Try” pages provided or use it to check your work after completing the “Try” pages.
5. Complete the “ <b>Independent Practice</b> ” and turn it into your teacher	Complete the independent practice problems independently provided for the lesson. You will turn these into me, and I will check your understanding. If something is not done correctly, I will ask you to complete the problems that are incorrect again to show you understand the concept.
6. Complete fact practice	Extra math practice book at home, April math calendar
7. How is this assignment turned into the teacher?	Please take a picture of your work and have your parents email it to me. Thank you!
