

# Lesson 6 Skills Practice

## Analyze Data Distributions

1. **AGES** The graph shows the ages of people in a play.

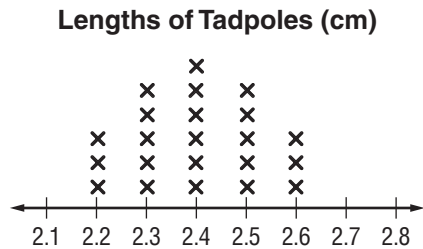

- a. Describe the shape of the distribution. Identify any clusters, gaps, peaks, or outliers.

- b. Describe the center and spread of the distribution. Justify your response based on the shape of the distribution.

2. **SCIENCE** The graph shows the lengths of tadpoles in a small puddle.

- a. Describe the shape of the distribution. Identify any clusters, gaps, peaks, or outliers.

- b. Describe the center and spread of the distribution. Justify your response based on the shape of the distribution.
