

Spheres

Sphere - the set of all points a given distance away from a center point

Volume -

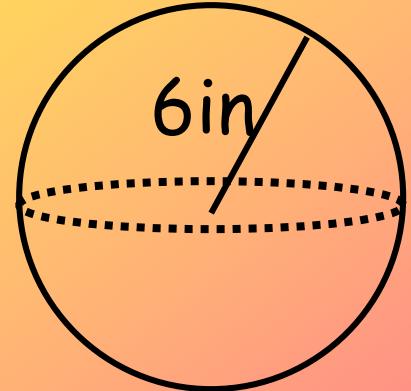

$$V = \frac{4}{3} \pi r^3$$

Total Area -

$$T.A. = 4\pi r^2$$

Example 1 - Find the Total Area and Volume of the Sphere

Radius - 6in

Volume - $V = \frac{4}{3}\pi r^3$ $V = \frac{4}{3}\pi 6^3$

$$V = 288\pi \text{in}^3$$

Total Area - $T.A = 4\pi r^2$

$$T.A = 4\pi 6^2$$

$$T.A = 144\pi \text{in}^2$$

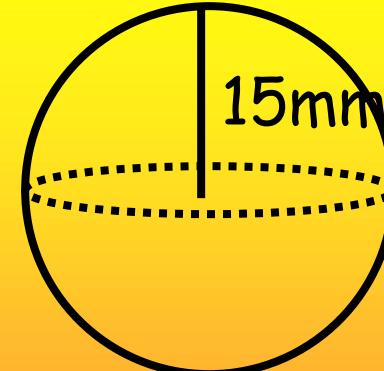

Why is there
no LATERAL
AREA?!?!

Example 2

$$r = 15\text{mm}$$

$$V = 4500\pi\text{mm}^3$$

$$\text{T.A.} = 900\pi\text{mm}^2$$

Example 3: $C = 20\pi\text{in}$

$$r = 10\text{in}$$

$$V = 1333.33\pi\text{in}^3$$

$$\text{T.A.} = 400\pi\text{in}^2$$
