

## Chapter 27 - Presentation Assignment

1. Choose a partner AND an assignment topic from the list below. Tell the teacher.
2. Research your topic in the library with your partner. You will need at least three sources for your team, one being the text book and then at least one article for each person. You can have more sources.
3. Create a works cited page for the back of the poster.
4. Read your section of text (\*=not in text, all online research, see topics below). Write your own notes from the text on a separate piece of paper; you will have to turn that in as well.
5. Create a poster of your information, using your words, not the text's/source's words so everyone understands what you are teaching. Use the computers to type your information in large, easy to read letters to attach to the poster, if you wish.
6. Practice what you are going to say and be prepared for questions from the class and teacher.
7. Turn in your articles and poster (with the works cited page on the back) together when you present.
8. ***THIS PRESENTATION COUNTS FOR A GRADE***, so do your best, and remember what didn't work well from the very first one. Be clear, know your topic, be interesting, and don't read to us.

### **Topic choices:**

1. Spending styles, Present or Future oriented, Definition/Differences/Examples
2. Credit cards vs. Debit cards, Differences/Advantages/Disadvantages
3. Checking accounts and ATM cards, Differences/Advantages/Disadvantages
4. Loans, Different Types/How interest is charged/Procedures/Advantages/Disadvantages
