

SAT MATH PREP
MR. MCGLONE – C229
cmcglone@cbsd.org

Welcome to SAT Math prep. The purpose of this course is to prepare you to take the math portion of the Scholastic Achievement Test (SAT). Topics that will be covered include: arithmetic review, algebra review, geometry review, probability and data interpretation.

CLASS PROCEDURES

1. Required materials for class include the workbook (**\$20**), notebook (3-ring is recommended), pen or pencil, and calculator. You may use a graphing calculator; I have some that may be used during class. You must have collateral to borrow a calculator. If you are going to purchase a graphing calculator, stick to the TI-84 family. Bring all of these materials to class every day.
2. Every Friday we will take a practice SAT (math sections only.) Make sure you bring a **non-mechanical** pencil and your calculator for these practice tests.
3. Each homework or classwork assignment will be graded as either 10, 5, or 0 points out of 10: 10 points for full credit, 5 for partial credit, 0 for no credit.

GRADING

60%: Homework/Classwork
20%: Practice Tests
20%: College Research Assignment

1. The grading scale is the same as that outlined in the Student Agenda handbook.
2. Extra help is available upon request; feel free to set up a time with me as necessary. You can also contact me via e-mail (cmcglone@cbsd.org) if you have any questions. This has worked well in the past particularly if students have been absent and want to get missed assignments.

ACADEMIC INTEGRITY POLICY

Students are expected to meet academic challenges with the highest degree of integrity and honesty. When questions arise about research or learning activities, students should demonstrate the discipline necessary to seek guidance from their teacher, rather than resorting to inappropriate behaviors that may undermine their own academic integrity and the learning process.

All students should read and understand the **CBS Academic Integrity Policy**, and ask questions or seek clarification if they are unsure of how that policy relates to academic work in general or to specific assignments for this course. Consequences will result when this policy is violated.
