Graphing Inequalities

$$y < -\frac{1}{2}x + 3$$

slope y-int

① Solve for y
(y = mx + b form)

② Sketch the graph
(plot y-int, use slope to plot more points)

$-\frac{1}{2}$ rise
2 run

③ Dotted line (not equal to) > or <
vs.
Solid line (equal to) \geq or \leq

④ shade above (greater than) \geq or >
or
shade below (less than) \leq or <

Solving Systems of Inequalities (only method is graphing)

$$y \geq 2x - 3$$

$$y < -3x + 4$$
