MAKE A GROOVY LAVA LAMP

Using stuff you probably have lying around the kitchen, you and your family can make your very own lava lamp and learn a bit of science while doing it!

HOW LONG IT TAKES

15 minutes

WHAT YOU NEED

clear jar with lid
water
food coloring
glitter
vegetable oil
salt
flashlight

WHAT TO DO

1 FILL the jar three-quarters full of water. Add drops of food coloring until you like the color you see. A few drops go a long way! Sprinkle in glitter for extra sparkle.

2 FILL the jar almost to the top with the oil and let the mixture separate.

3 POUR salt into the jar until you see the cool lava lamp effect. When the bubbles stop, add more salt to see it again.

4 SHINE a flashlight behind the jar to watch your lava lamp really glow!

ent sounds you make.
