- [NETS by Location report for the 21st Century Skills Assessment](#)

Content Administrator: This role grants the ability to assign training to users. Assigning training is done on each training page (e.g. tutorial series, workshop, etc.). All non-shared accounts have the ability to assign training to themselves, but this role grants the ability to assign training to other users.

- [Recommending training](#)
- [Managing Assigned Training](#)

Group Administrator: This role grants access to the Manage Groups option in the Manage Users section under Admin Tools. This section is used to manage the user groups, which in turn are used for features such as assigning training or message center. Such as creating a group for each class hour.

- [Setting up groups](#)

Progress Report Administrator: This role grants access to the View Reports section under Admin Tools. This role grants access only to the Progress Reports.

- [Progress Overview Report](#)

Atomic Learning is a great help desk resource to get answers to those "How do I do that?" questions right when you need it. Visit this training: [Atomic Learning Path - Learn](#)

Bring technology into your personal professional development. This online series highlights some of our great PD features and functions. Visit this training: [Atomic Learning Path - Grow](#)

Let Atomic Learning help you bring technology into the classroom. Use projects "as is" or modify them to meet your needs, and share specific resources with your students. Visit this training: [Atomic Learning Path - Grow](#)
