

Quick Guide: Using your fingerprint to login to your computer.

Goal: Use your fingerprint to login to your computer.

Step 1: Click **Settings**. Search **Sign-In Options**.

Step 2: Click **Fingerprint Set up**.

Fingerprint

Set up

Step 3: Click **Get Started**.

Welcome to Windows Hello

Your device just got more personal. Say goodbye to entering complex passwords and start using Windows Hello to unlock your device, verify your identity, and buy things in the Store using your face.

Get started Cancel

Step 4: Lift and touch your finger on the sensor (next to the intel sticker).

Lift and touch again

Optional: Add another finger print.

All set!

Use your fingerprint the next time you want to unlock your device.

Optional Step 5: On the sign-in screen (where you normally enter your password), click **Sign-In Options** (below where you normally enter your password). Select the **fingerprint icon**. The fingerprint option will work whether you keep your sign in screen the same (where you type your password) or change it to fingerprint only.

Notes:

- If you want to lock your machine while you are away from it, press **Windows + L**.
