

Hello Third Grader!

Got Grit? Welcome to my 3rd grade classroom where students learn to have a growth mindset and show perseverance. Having a growth mindset means:

Challenging Yourself

You Learn from Failure

Effort and Attitude Determine Everything

Becoming Inspired by others' success

Don't worry, you will quickly learn to show this kind of thinking. In the meantime, check out this quick video to learn all about it!

Grit and Growth Mindset Video

Third grade is an exciting year for other reasons too! We get the chance to study interesting subjects like motion and geography. In addition, we will learn cursive, raise butterflies and have an economics fair. On top of that, we get to explore new chapter books, write incredible stories, and challenge our minds with brain teasers in math!

I am so excited to spend the year together and can't wait to learn more about you. In fact, if you would like to contact me before school starts...that would be great. With your parents' permission, please send a short email explaining the following things about yourself...feel free to include a picture of yourself!

Dear Mrs. Scala,

My name is _____. There are three things I would like you to know about me. First, I like _____. Second, I am excited to learn _____. Third, a fun fact about me is _____. I am looking forward to a _____ year!

From, _____

On the first day of school, be sure to bring your positive attitude and a desire to do your best! I can't wait for our fabulous year to start!

Fondly,

Mrs. Scala
