Engineering for Kids
1) Jr. Medieval Defense
Do you have what it takes to defend your castle and maintain your family’s honor? If so, then don your armor and draw your sword for the Engineering of Medieval Times! In this camp, students build their very own castle and then work to defend it by engineering cannons and catapults.

2) Medieval Mayhem
In medieval times, there were a huge number of engineering innovations. Crossbows, drawbridges, towers, cranes, the compass, and many more were invented during those times. The lands were ruled by feudal courts in a castle, with each castle having a great deal of land around it that was ruled by the lords and ladies of the castle. Because owning land meant more power, many lords and ladies went to battle with other lords and ladies, trying to take their castle and control their land. This led to many incredible devices being engineered, such as catapults. Student will split into groups forming their own feudal courts of lords and ladies. They will try to beat out other teams in various challenges to show their prowess and be crowned kings and queens of the land with the Engineering for Kids Crown. Please note: There is no camp on Thursday, July 4th.

3) Jr. Hardware Eng.: Scratch Programming & Makey Makey
When your favorite song comes on the radio do you sit quietly or do you dance around and play the air drum solo? In Musical Adventures with Scratch and Makey Makey, we are going to explore how different sounds are created and we will create our own interpretations of common musical instruments like drums, piano, guitar, and even a recorder. In
addition, we will create our very own dancing program, all through the use of Scratch and Makey Makey to bring our music to life! The last day will end with a bang, or at least a really great mini concert from all our students!

sticks and softer lacrosse balls will be used for this camp, but children are welcome to bring their own sticks if they like.

Note: There are slight differences in competitive girls lacrosse and boys lacrosse. However, all basic skills are taught the same, except for a difference in cradling, which will be taught. Boys sticks are recommended for beginner players, as they allow for a higher success rate for skills. (Girls lacrosse sticks have a more shallow pocket, which makes catching more challenging, especially with a lighter ball.)

It meanders through the woods in a peaceful, natural environment and offers 9 stations, or “pods,” that provide activity to those with sensory limitations and disabilities. Premier Trip Testimonials
"Our overall evaluation of the Arizona trip was a resounding A. To start out, logistically everything, including the preliminary information flow, the logistics of getting to and from Arizona, accommodations, and the daily coordination of events as well as the selection of events was outstanding." - Roger O. (Great Trains & Grand Canyons)

"Our daily travels included frequent [breaks], refreshment and photo stops, and it seemed that our arrival timing was always spot-on at the major attractions so we didn’t have to deal with huge crowds, and could sight-see and shop at a comfortable pace." - Steve T. (Treasures of Ireland)
