

Carson LaGreca

GDP Poem

TWO roads diverged in a yellow wood,  
And sorry I could not travel both  
And be one traveler, long I stood  
And looked down one as far as I could  
To where it bent in the undergrowth; <sup>5</sup>  
Then took the other, as just as fair,  
And having perhaps the better claim,  
Because it was grassy and wanted wear;  
Though as for that the passing there  
Had worn them really about the same, <sup>10</sup>  
And both that morning equally lay  
In leaves no step had trodden black.  
Oh, I kept the first for another day!  
Yet knowing how way leads on to way,  
I doubted if I should ever come back. <sup>15</sup>  
I shall be telling this with a sigh  
Somewhere ages and ages hence:  
Two roads diverged in a wood, and I—  
I took the one less traveled by,  
And that has made all the difference.

Two men diverged in a different way  
And sorry I could not choose both  
And be one person, in dismay  
And I chose one, I made my say  
The right one, I know it  
And the other, not as fair  
And having perhaps worse claim,  
Wanted government spending  
In large sum  
And death in the long run  
Thought prices and wages were sticky  
All of this is truly icky  
Hayek is the way  
Less government spending  
And fearing the boom, not the bust:  
Two men diverged in a different way, and I  
I took the one less popular,  
And that has made all the difference.

Kelly Myers

Economist (to the tune of Piano Man)

It's nine o'clock on Tax Day  
Our reimbursements are flooding in  
And the people are cursing the economy  
And how high unemployment has been

They say, "Hey, these taxes are regressive  
And this nation is supposed to be few  
But we're in a mess  
In a big game of chess  
And freedom is the last thing we see."

Write us a policy, you're an economist!  
John Keynes, you're the professional here  
Well we're all in the mood for an expansion  
Because a recession is what we all fear.

Now Keynes is a fan of the short run  
And wants to boost aggregate demand  
And those animal spirits  
Will increase the limit  
Of motivation in every man..

He says "Hayek, I believe this is killing me,  
The Austrian School you propose  
Pushes aside the government that's here  
To help our economy grow."

Don't leave us in the trough, you're economists!  
But you can't agree in what's best...  
We dream that we'll teach  
The Business Cycle peak  
And only then will we be impressed.

Jon Guba, Ashley Resuta, Ayela McDonald

Hear me out with my fiscal policy

'Cause who wrote the book on macroeconomy?

We've got animal spirits focused on self preservation

That tell us when to invest in business or nation.

You want to wait for the economy to stop being funny

Well you'll still be waiting while I'll be getting money.

You think you're clever with your g plus C plus I

But after a while you'll see a catastrophic drop. Why?

People aren't chess pieces you can't tell them what to do

Save the Sorcerer's Stone they got thoughts and motivations too.

Recessions are natural it's just a business cycle

If you keep using quick fixes you'll just enter a downward spiral

At least I have fixes you wouldn't do scrap

You'd let the market crash while you just take a nap

If you'd just start spending, you might see why

Because you see money's impact will multiply

You want to help the market? Get the future out of your head

It's pretty common knowledge, in the long run we're all dead.

You seem to have this all figured out

But your presence of knowledge is enough to make me shout

Animal spirits? Where are we an aquarium

You should let the market establish equilibrium.

Capitalism is a profit loss system.

Like I just won and you just lost so go back to Britain.

Gillis Wang

**"Hayek's Chokehold"**

**(feat. Patrick Stump of Fall Out Boy)**

Ba ba da da  
Ba ba da da  
Ba ba da da  
Ba ba da da  
Ba ba da da

Take a look at my policy  
It's the only one I got (ba ba da da)  
Not much of a policy  
But you never seem to spend a lot (ba ba da da, ba ba da da)

It's been some time since we last grew  
So this is gonna feel like de-ja-vu  
But Hayek we in a trough again  
It's safe to say we in a recession

And I know it sounds so old  
But Hayek got me in a chokehold  
And I'm afraid I might give in  
Taxes on the mat my white flag is wavin'

I mean they even tax my pancakes  
And Alka Seltzer when my tummy aches  
If that ain't love then I don't know what love is

We even got a secret handshake  
And she loves the music that my band makes  
I know I'm young but if I had to choose her or the sun  
I'd be one nocturnal son of a gun

(ba ba da da, ba ba da da)

Take a look at my policy  
It's the only one I got (ba ba da da)  
Not much of a policy  
we never seem to spend a lot (ba ba da da, ba ba da da)

Take a look at my policy  
It's the only one I got (ba ba da da)  
Not much of a policy

we never seem to spend a lot (ba ba da da, ba ba da da)

It's been awhile since we spent last and I'm tryin' hard not to talk fast  
But Fred I'm finally thinkin' I may have found the one  
Type of spending will grow you and your funds

And I know you heard the last song about the growth that didn't last long  
But I promise this is on a whole new flow  
I can tell by the way we'll spend that dough (ba ba da da)

I hate it when you save my cash  
Cuz in the end we will all be ash  
If that ain't love then I don't know what love is (ba ba da da)

Stephanie Mitchell

"Waste" ("Waste" by Foster the People)

Won't hold your hand when you are failing, won't bail you out  
I know it's tough to swallow but if we help you out now it'll hurt us down the road  
If you want laissez-faire to be gone, do you think free market is wrong?  
You've got Keynes in your head but I know you can shake him off

CHORUS: And all of the taxes that you're gonna waste, that you're gonna waste, you will  
And all of the risks that you're gonna take, that you're gonna take, you will  
This moral hazard makes you confident, overconfident, yeah  
So when you fail again, we'll have no more money left to spend

You say make an exception, this one time, you say you're too big to fail  
You say your loss of revenue would impact the aggregate market, mm  
I know that you can tell what you're saying is one big fallacy  
The money we will spend to fix the windows that you've broken can go back in the economy

CHORUS

The truth hurts but we're all better off  
Letting industries fail when it's their time  
You did something wrong, must've done something wrong, you did

CHORUS

Nico M., Jordan John, Trevor Belding

Ms. Hayek

in the Style of Ms Jackson by Outkast

This one goes out to all the Keynesians, Keynesians, Keyneins ya

Yeah it goes like this

(HOOK)

I'm sorry Ms Hayek, I am for real (Ohh)

Never meant to spend all that money

The trillions we owe are not that funny

Repeat

Big Boi verse (Jordan John)

HOOK

Me and your son got this debate goin on

You say to sit and watch

I say spend it all

To spend or not to spend, spending is the question

Money's impact will multiply

Keysian views will best him

When recession hit us back in 2009  
Lack of spending, drops in aggregate demand,  
Cause an economic decline  
The paradox of thrift, people save money, this causes a shift,  
Business failure ain't funny  
Bout individual decisions on animal spirit,  
Spending lack of confidence causes individuals to fear it  
Forever waiting for market equilibrium is a dread  
If we all wait in the long run then we are all dead  
Ms. Hayek, My intentions are good, if we could be  
Cutting our taxes, increasing spending,  
The economy would be running as it should  
Focus on the short run  
That's the way it should be,  
AD effects GDP and employment son,  
But not prices see  
Prices and wages all sticks  
Prices are high but people losing jobs as our clocks tick  
So know this,  
Know about spending and the multiplier increase, our spending  
The future of our consumption and output will spread like a wild fire

HOOK

## Layna Mager

Keynes and Hayek

Keynes says prices are sticky.  
But, Hayek thinks, when allowed, they're flexible.  
When their jobs are at risk, it's better to keep your job than be  
picky.  
Eventually the markets will reach equilibrium and become stable.

Is it better to boost aggregate demand or let supply create demand?  
Do you involve the Congress or the Fed?  
Hayek wants the economy to move with the help from the Invisible Hand.  
He knows you can't just know people's motivation with just your head.

Start spending now, in the long run, we're all dead.  
Money's impact on the economy will multiply.  
That's what Keynes said.  
All the government has to do is try.

There are many opinions on how to deal with recessions and inflation?  
Maybe a balance of Keynes and Hayek would be best for the nation.

Hailey C

Shall I compare thee to the yearly Gdp?  
Thou art more prosperise and high  
Rough times do shake the darling rise of GDP  
And recession all too long to a date  
Sometimes all to low the GDP shines  
And too often is his yearly spending dimm'd  
And every year from year sometimes declines by chance or mans changing  
course untrimm'd  
By thy eternal worth shall not fade  
Nor loose value of that fair thou worth  
Nor shall depression brag thou wander'st in his shade  
When in eternal worth to time thou growest  
so long as men can spend or men produce  
So long lives spending and this gives life to GDP

## Thriller Remix ~ Summer Holmes

It's time for spending and the recession seems to be getting worse  
Under the government, you see they need to create more programs  
We start to fear, but I guess that's what you call animal spirits  
You start to save, but prices and wages are very sticky  
So consume now!

Cuz this is spending, government time  
And you're not gonna regret it cuz you will benefit  
This is spending, government time  
You will fight to spend your money, so lets raise this GDP now!

You start to care more about the short run and not the long run  
You see the darkness because we will be dead in the long run  
But that's just the thing, we need to use the multiplier effect  
Because all we see is a decrease in GDP  
So consume now!

Cuz this is spending, government time  
And you're not gonna regret it cuz you will benefit  
This is spending, government time  
You will fight to spend your money, so lets raise this GDP now!

Kathryn Gruber to the tune of Hey Soul Sister by Train

Hey Consumer

The recession  
We recess whenever we don't spend  
We knew we had to expand  
So we went and raised our aggregate demand  
We're seeing growth  
The employment is going up, we know  
We've been here all before  
Great depression Keynes found the cure,  
our savior, our economy is sure

So hey consumer,  
Ain't the answer answer  
In spending so  
Tomorrow  
Let's throw away some money, oh  
Hey consumer,  
No more micro only macro,  
Tonight

Let it go  
Let it go  
Can't hold them back anymore  
The government, who keeps intervening,  
They push and they pull  
All the money circling through and through,  
They increase our inflation,  
Constantly 'trying' to help  
But to no avail!  
All this inflation turning  
Our economy Topsy turvy  
Why can't they just  
Let it go  
Maddie Wilhoit

The cycle repeated  
As recession lurks in the sky  
All that I needed  
Was to tighten up money supply  
And Hayek is there at the turn  
Waiting to let me know

We're spending it up  
To fall back down  
We're spending it up  
To fall back down  
We always fall back to the ground

Government spending  
Is the way to stop recession  
I tried to fix this  
but could not bring the taxes down  
And Hayek is there at the turn  
laughing at me so  
And I am there at the turn  
Watching recession go

We're spending it up  
To fall back down  
We're spending it up  
To fall back down  
We always fall back to the ground

They told me yes, they held me high  
And the people believed when I told that lie  
They played worker, I played king  
We all fell down when the recession came  
I lost my right to hold that crown  
They built me up but I let them down  
So when I fall you'll take your turn  
And I'll just sit and watch from my urn

And Hayek is there at the turn  
Waiting to let me know

We're spending it up  
To fall back down  
We're spending it up  
To fall back down  
We always fall back to the ground

So when I fall you'll take your turn  
And I'll just sit and watch from my urn

We always fall back to the ground  
So when I fall you'll take your turn  
And I'll just sit and watch from my urn

We always fall back to the ground

Sincerely,

Noah brous

## Matt Bahner Slim Shady Parody

May I have your attention please?  
May I have your attention please?  
Will the real FA Hayek please stand up?  
I repeat, will the real FA Hayek please stand up?  
We're gonna have a problem here..

Y'all act like you never studied economics before  
Ya think to stop recession all ya gotta do's spend more  
And start demanding more and more and more  
But you Keynesian fools, you got something wrong  
A bigger government will make our economy less strong  
When our market stumbles, yes ours, we the people  
What should the government do?...give us power, the people  
Stop spending our money, don't try and stimulate  
Nature will save us by attaining constant rates

John Keynes, I'm sick of him  
Look at him, spending our money on who-knows-what  
savin none of us but you-know-who." "Yeah, but it helps for now though!"  
Yeah, I think he's got a couple of screws up in his head loose  
You say we're all dead in the long run  
But you can't think in the short run  
Our economy won't fix if you beat a dead moose  
You think I don't have economics of my own?  
well I guarantee and assure you theres a lesson to be learned  
When unemployment rises due to a drop in demand  
We need to ditch Keynes's economic spending plan  
Normal GDP will return with increase in supply  
but without a free market in the long run we'll all die  
By the time demand is low  
lower prices start to show  
An although, you know, business starts to slow  
Lower prices will allow our supply to grow  
But if we can't use our money on our own  
Cuz the government decides its time to run the show  
Then equilibrium will never be known

*[Chorus - Eminem (repeat 2x):]*

'Cause I'm FA Hayek, yes I'm the real Hayek  
All you other Jon Keynes are just imitating  
So won't the real FA Hayek please stand up,  
Please stand up, please stand up?

Washed by the Water-Lyric Remix  
By: Kelly Hollenbeck

Keynes was a moneymen  
He said to spend!

Put all that money into circulation, you'll be better off in the end

People start spending; just to boost the economy  
Some people started to accuse our system, & say theirs no stability

Though it might be painful, spending all your hard earned money,  
It will help us all to boost the economy, and will never fail

Chorus x2:  
Even when the tsunami's fall  
Even when unemployment stops rising  
Even when the storms fall

Our GDP is rising

Even when the economy crashes under our feet  
Even when the ones we love end up on the street

Chorus x2:  
It won't Fall  
It won't Fall

It won't fall as long as you keep spending

Hannah Laboski

Hayek and Keynes' ideals never seem to match

They mostly disagree

A compromise they could never agree

Who is right, we shall see

Keynes always seems to have the right idea

Keep unemployment low

Spend your money and get to Santa Maria

When it comes to spending don't say no

Keynes believes that prices and wages are sticky

Hayek says they are flexible

Keynes is right and Hayek is icky

Keynes is our country's angel

Without Keynes we would know nothing

With him our economy is in upswing

[Anna:] Okay, can I just... talk some Keynesian economics?

[Hans:] I love Keynesian economics!

[Anna:] I always deal with these Austrian dorks in my face  
Who preach saving is the thing to do...

[Hans:] I was thinking the same thing! 'Cause like  
When they scrimp, the GDP falls right on its face  
They're left with lots of money, and nowhere to work, too.

[Anna:] But it's true...

[Hans:] But it's true

[Hans:] Saving too much...

[Anna:] Hoarding cash now...

[Both:] Is useless when you're knocking on death's door!

Our GDP will soar!

Our GDP will soar!

Our GDP will soar!

[Anna:] If we--!

[Hans:] Spend more!

[Anna:] Spend more!

[Hans:] Spend more!

[Both:] Our GDP will soar...

[Hans:] I mean what we really need...

[Anna:] What?

[Hans:] Is intervention from the—

[Anna:] Government!

[Hans:] That's what I was gonna say!

[Anna:] People suffer when--

[Both:] Free markets are too free!

Jinx! Jinx again!

When prices and wages are sticky

Our problem becomes quite tricky

[Hans:] So--

[Anna:] we must--

[Hans:] save--

[Anna:] our--

[Both:] economy!

[Anna:] Say goodbye...

[Hans:] Say goodbye...

[Both:] To the pain of the past

Recession, unemployment, out the door!

Our GDP will soar!

Our GDP will soar!

Life can be so much more!

[Anna:] If we--!

[Hans:] Spend more!!

[Anna:] Spend more!!!

[Hans:] Spend more!!!!

[Both:] Our GDP will soar...

A High Debt  
based on Stairway to Heaven  
Jenna Wohlpart

There's a man who is sure  
high GDP is the best  
and he's spending his way to a high debt  
accumulation of deficit- spending more than you make  
will soon lead him to be in trouble  
and he's spending his way to a high debt

There are signs to show him that this is a sin  
but he refuses to ever see them  
In the time of his youth, there's a man who would say  
Getting involved in the economy is the best government can do  
And it makes him wonder

And it's whispered that soon, if he spends so much more  
Then it will cause high inflation  
And a new day will dawn where his policies aren't the supreme  
And the people will shout with joy

If the economy turns south, don't be alarmed now  
It's just a natural business cycle  
And there are two paths you can go by, and in the long run  
The economy will reach equilibrium on its own  
And it makes him wonder

His head is humming, cause he doesn't know how things will play out  
Will demand really boost the economy  
Dear old man how can you know that your way will work  
To think so is a pretense of knowledge

And as he tries to increase aggregate demand  
Unemployment just keeps on rising  
And monetary policy isn't working  
Low interest rates will harm us all  
And the common man can only watch  
As his economy is destroyed  
To create a boom makes another bust  
Government interaction doesn't help  
It will only create a debt  
And he's spending his way to a high debt.

Bethany Nielson

Block 1

## Economy Poem

When the economy is down in the dumps

And the unemployment rate is soaring

Have no fear because this is only a bump

Soon we will have the economy roaring.

It is times like these where we have to be smart

For all we have to do is stop and save our money

This way we will save ourselves from a broken heart

And have extra money on a day that is sunny.

Thanks to Keynes we have this plan to live by

In order to keep America's GDP high.

Avery Cox, Molly Holcombe, Erin Maguire, Shelby Zanine

We don't know how to fix the economy  
Should we increase or decrease the amount of money?  
And I don't know if I should believe Keynes anymore.

Should I save or should I buy?

Hayek wants supply, so Keynes tried to make money's impact multiply

Prices rise in the blink of an eye

And he's finally have figured out why

He doesn't think like everybody else

He thinks to help people like himself

Try and boost aggregate demand so government spending can expand

So should we spend now or later?

And there's no chance that we'll figure it out

That's why G.D.P. isn't stimulating the economy

And Hayek said that's fine, but Keynes believes he had lied

That's why G.D.P. isn't stimulating the economy

And Hayek said that's fine, but Keynes believes he had lied

Hayek wants to wait for equilibrium to create

Supply will make it's own demand

Stop focusing on the problems now at hand

Our nation can't have deficits

Because everyone needs to benefit

Try and end government spending so the economy keeps expanding

So should we spend now or later?

And there's no chance that we'll figure it out

That's why G.D.P. isn't stimulating the economy

And Hayek said that's fine, but Keynes believes he had lied

That's why G.D.P. isn't stimulating the economy

And Hayek said that's fine, but Keynes believes he had lied

## **John Maynard Keynes**

The paradox of thrift  
Is when people save instead of buy.  
That causes the economy to downwardly drift  
And businesses to die.

In the long run, we are all dead,  
And that's really not fun.  
So the only way to stay ahead  
Is to focus on the short run.

There is a certain sort of confidence:  
Animals spirits; that is our driving force.  
It helps the economy obtain dominance,  
And project us through the right course.

The government needs to spend, spend, spend,  
And then the economy will mend.

Abby Staskel  
Keynes/ Hayek Poem- English Sonnet

Inflate; motivate  
Spending will make you relieved  
Downturns are our fate  
This is what Keynes believed

The secret to an interest rate  
Is to never make them fake  
Low ones are used as bait  
A big problem it will make

Sticky is what prices are  
Animal spirits drive what we think  
Go spend your money on a car  
Government spending and GDP have a link

Prices are driven by inflation  
Companies such never be bailed out  
People have their own motivation  
That's what the Classical approach is all about

Hayek believes in supply side economics  
But that doesn't mean Keynes ideas are comics!

## **To the tune of "I love college"**

Katie, Matt, Elle, Nate

The recession last year was awfully crazy I wish we fixed it  
We spent our tails off and all the programs, they never helped it  
Increase spending, raise GDP,  
But low unemployment's all we need  
Started at three, ended at 10  
Failed policies, won't make them again, man I love spending...

I wanna fix the economy by doing it right  
Spend lots of money, get markets in flight  
Boost total demand by spending all year  
Spending is fixing and that much is clear  
Wages are sticky-  
They are so tricky  
My plans on the table  
Do what you want  
I am champion, in this economy song,  
Solution's not long, the problem is gone  
Inflation won't bounce, not in my house  
You know we're gonna make it, here's my plan take it  
Money isn't wasted when we have to face it  
We're dead in the end so all we could say is, um

The recession last year was awfully crazy I wish we fixed it  
We spent our tails off and all the programs, they never helped it  
Increase spending, raise GDP  
But low unemployment's all we need  
Started at three, ended at 10  
Failed policies, won't make them again, man I love spending..

Man I love spending  
And I love saving  
And I love investing  
Man I love saving

I can't tell you what you learned from Keynes  
But (nah) I could tell you a theory or two, um  
Yeah of course I learned some rules  
Like all recessions are natural

And people will save that's factual  
Lowering interest rates, that's tactical  
When it comes to spending, don't be radical  
The economy; it's very fragile  
Lower interest rates, my ideas aren't wrong  
It results in things that last very long  
Money's often wasted and sometimes we have to face it  
We shouldn't leave it to our kids so I can say is

The recession last year was awfully crazy I wish we fixed it  
We spent our tails off and the all programs, they never helped it  
Increase spending, raise GDP  
But low unemployment's all we need  
Started at three, ended at 10  
Failed policies, won't make them again, man I love spending...

Now, if everybody would please put their money  
As high as they can, as high as they can  
And repeat after me:

Spend spend spend spend spend spend spend  
Saving saving saving saving  
Do somethin crazy! Do somethin crazy! Do somethin crazy! Do  
somethin crazy!  
Save money, save money, save money, save money

That recession last year  
(Man I love spending, love it, I love it!)  
That recession last year

Alright everybody, I gotta head back to Germany for a little bit

The recession last year was awfully crazy I wish we fixed it  
We spent our tails off and the programs, they never helped it  
Increase spending, raise GDP  
But low unemployment's all we need  
Started at three, ended at 10  
Failed policies, won't make them again, man I love spending...

I love economics, does the market really have to fluctuate or can  
it just stay like this for the rest of my life?

To the tune of "Party in the USA" by Miley Cyrus

By Erin Rafferty

John Maynard Keynes wants us to spend  
In the long run, we're all dead.  
Workers won't accept lower wages,  
People wanna self-preserve.

Spend your money  
To boost Aggregate Demand,  
Use fiscal policy to decrease taxes.  
This will not impact price  
Until we reach full employment.

No equilibrium will be reached even in the long  
run  
Money's impact will increase.  
The Federal Reserve should increase funds  
And lower interest rates,  
And lower interest rates,  
And lower interest rates.

It is all the spending  
On all final goods  
Produced in one year.  
To increase our standard of living,  
We all need lots of growth.  
It is all the spending  
Of consumers and businesses,  
Government and net exports.  
Yeah, it's an increase in GDP.  
Yeah, it's a measure of the economy.

Friedrich Hayek opposes Keynes,  
Everybody shuts him down.  
Supply will create its own demand,  
Which will decrease the price.

Markets will reach equilibrium  
If price is allowed to function.  
People have their own motives,  
You can't ignore human action.

Recessions are natural and necessary,  
Prices and wages are changing.  
People's savings increase loanable funds.  
And lower interest rates  
And lower interest rates  
And lower interest rates

It is all the spending

On all final goods  
Produced in one year.  
To increase our standard of living,  
We all need lots of growth.  
It is all the spending  
Of consumers and businesses,  
Government and net exports.  
Yeah, it's an increase in GDP.  
Yeah, it's a measure of the economy.

The debate's still not resolved (not resolved)  
Keynes and Hayek argue all night (all night)  
So which economist is correct?  
They both have valid points, only time will tell

It is all the spending  
On all final goods  
Produced in one year.  
To increase our standard of living,  
We all need lots of growth.  
It is all the spending  
Of consumers and businesses,  
Government and net exports.  
Yeah, it's an increase in GDP.  
Yeah, it's a measure of the economy.

You are the Only Exception Steph Mitchell

The economy crashed and the government asked what... what should we do  
They asked two different men what they had to say... and here... it is  
John Mayerd Keynes stood quickly, said simply, spend baby spend  
Doesn't matter where, so long as it comes back to the people...

All you need to do

Is spend now, and now spend quickly  
Free funds, keep interest rates low  
C, G, all the way up now  
Spend now, and do it quickly

That's when Hayek said no; first we must save... let nature take its course  
We need to find other ways, to equilibrate  
I've always said prices move... up and down... indiscriminate  
Forget animal spirits and spending for the sake... of spending  
'Cuz that will only hurt in the end

Free Markets, save for the future  
Forget, the pretence of knowledge  
We aren't, chess pieces on a board  
Leave inflation rates to nature alone

Ohh... ohh... Yeah.... Ohhh

Politicians said Kansian sound really easy  
Then Hayek said "but think about the deficits"  
Keynes said who cares if we're all dead in the long run  
We need to be ok now, not a century...

Ohhh

Keynes was easy, politically beneficial  
Hayek was hard, to hear and comprehend  
The mood has changed between the two  
But both views are still in use

Spending has led to broken economies  
Nervous citizens lead to recessions  
This is why we need to hear Hayek  
Fix what's broken, even if it is hard

Even if it is hard

Tune of wreck ball  
in Money Crisis

Emily McCabe, Chase Norman, Tom N.

## Wrecking Keynes

Keynes tried to change the GDP,  
Without ever asking why.  
People fell under his spell,  
but now the economies falling down.

Hayek tried to say, we should coordinate,  
Markets should all be free.  
Keynes just acts to fast.  
His solutions just won't last.  
Sadly, this hurts the GDP

Hayek came in like a wrecking ball.  
Hands off approach to help us all.  
Free markets for economy,  
Will create perfect harmony (x2)

Keynes thinks he's high up in the sky.  
Growth relies too much on trust  
Increase demand that was his plan,  
but Hayek knew this wasn't a must

I guess you could say Hayek walked away,  
Let our economy be.  
Nothing can be done,  
Hayek's time has begun.  
Boom not bust is the key

Hayek came in like a wrecking ball.  
Hands off approach to help us all.  
Free markets for economy,  
Will create perfect harmony (x2)

He never meant to start a war.  
He just didn't want Keynes to win.  
He won't give up,  
Won't let him win.

Hayek came in like a wrecking ball.  
Hands off approach to help us all.  
Free markets for economy,  
Will create perfect harmony (x2)
