

Do you want to help the economy?

(Do you want to build a snowman?)

Do you want to help the economy?

Come on, let's go and spend

GDP doesn't increase anymore

Come help us out

It's like you do not care at all

We use to spend our money

And now we don't

Why do you think unemployment is so high?

Do you want to help the economy?

It doesn't have to decrease aggregate demand

Do you want to help the economy?

Or buy an Iphone 5

I think some consumer spending is overdue

The economy needs a boom

It will help us all

(Don't you agree Keynes?)

It gets a little lonely

All these empty stores

Just watching the GDP decline

Consumers?

Please, I know you have some money

People are asking why you haven't spend it

Keynes says "go and spend it", and I'm trying to

The Government is here for you, just go and spend

We only have fiscal policy

It's just spending and taxing

What are we gonna do?

Do you want to help the economy?

Mr. Brownstone – A Recession

It used to run on full employment
Prices stayed on line
And we didn't worry 'bout nothin', no
'Cause we're all dead in time

The GDP was increasing
Multiplier effect worked fine
Continued with deficit spending
Lowered taxes were working fine

Now we're dealing with
A recession
How to fix it is
Now the question

We used to spend a little but a little wouldn't do it
So the little got more and more
We just keep tryin' to make a little more
Said a little more than before
We used to save our money but the saving wouldn't do it
So the spending got more and more
We just keep tryin' to get money moving
Said moving more than before

Now we're dealing with
A recession
How to fix it is
Now the question

Now our debt has built up
We used to produce a surplus
But that GDP
It's real hard to handle
Probably gonna spend more, we must

To the tune of
Choose What You're Watching
Choose What We're Spending
(Thenewno2)
(Olivia Fortna)

The government continues to spend
It's sad how it doesn't even help us
And the smaller the GDP gets
All the taxes that they're spending

Their pretense of knowledge is misleading
On the overspending of the people
Can't fool us with your free lunches
GDP must be left alone

We must focus on the long run
We can't build up the debt
And they give you false hope
On the rising economy

Their pretense of knowledge is misleading
On the overspending of the people
Can't fool us with your free lunches
GDP must be left alone

They choose what you're spending and you don't mind
Choose what you're spending, what will you find
They choose what you're watching and you don't mind
It doesn't raise the economy and you don't mind

The way economy goes is natural
All the equilibrium and balance
Focus on the long run, not only now
And it will work itself out

Notorious B.I.G “Hypnotize” *The Economic Edition*

Note: You should probably listen to the real song first to get the beat down to fully understand **The Economic Edition**

*Uh, uh, uh c'mon
Hah, smarter than your average economist
Back to end this deficit, increase gov spending, that's the trick
Politicians, make sure you're listenin
Props for the rich, listen to my pitch
Dead right, economic might, Keynes here every night
Keynes been smooth and I never loose
Increase spending, GDP starts mending
The right thing to do, do something for us, help get through this
Hayek supporters want to beat us, hurt us, finish us
Who us? Yeah, Keynes you can't touch
Prices and wages are close so problems aren't much
Dare I stand by while to economy dies
No, increased inflation bring money out of circulation,
Recently people questioning my ideas, so I just preach and teach
Keep, my reach, of the goal I seek, that's right Hayek book it
Where's your first place trophy, ha that's right I already took it*

(Chorus 4x)

*GD, GD, GD, GDP (uh, huh)
Sometimes your growth just hypnotizes me (hip to)
And I just love your erratic ways
In recession you drop but that's okay (uh)*

Nick DiPietro

[verse1]

You're rising so good right now

And I would if I could, boost you right now

But I know that you're naturally stabling

And you have all my friends employed lately

[Hook]

I think you can do fine on your own

Spending isn't the right thing, everyone should be saving

You're recovering, oh, you've got it going on

Cause you are on the rise

Oh, and I ain't even worried, that you'll soon go low

Below potential gdp growth, I know that I can let you go,

Recessions are alright, the rise always comes back in sight

I know that's inconvenient, for politics

To just sit, and not try and fix

So theres no need for that stimulus,

Deficits, or blaming animal spirits

I know that's inconvenient, for politics

To just sit, and not try and fix

So theres no need for that stimulus,

Deficits, or blaming animal spirits

[verse2]

Now savings increase loanable funds,

Prices are flexible if they can just run

Don't create artificial interest rates

That't only just promote more waste

[Hook]

I think you can do fine on your own

Spending isn't the right thing, everyone should be saving

You're recovering, oh, you've got it going on

Cause you are on the rise

Oh, and I ain't even worried, that you'll soon go low

Below potential gdp growth, I know that I can let you go,

Recessions are alright, the rise always comes back in sight

I know that's inconvenient, for politics

To just sit, and not try and fix

So theres no need for that stimulus,

Deficits, or blaming animal spirits

I know that's inconvenient, for politics

To just sit, and not try and fix

So theres no need for that stimulus,

Deficits, or blaming animal spirits

Don't keep spending (happy)

It might seem crazy what I'm about to say
Frederick Hayek's here, Keynes can take a break
He's got different views, from outer space
With the air, like I don't care what the Keynesians say

Don't keep spending
Clap along if you feel like the government should spend
Don't keep spending
Clap along if you feel like the people know what to do
Don't keep spending clap along if you want the market to be set free
Don't keep spending
Clap along if you feel like the people know what to do

The long run is now, we can't avoid that
Don't spend all you've got, hold back
If we stay organic we'll be just fine
Don't bail them out there's a reason why, they're fried

Don't keep spending
Clap along if you feel like the government should spend
Don't keep spending
Clap along if you feel like the people know what to do
Don't keep spending clap along if you want the market to be set free

Don't keep spending

Clap along if you feel like the people know what to do

Spending, you spend me now

You'll have nothing, spend me now

The long run is now, spend me now

You'll have nothing, spend me now

I don't think were dead

You'll have nothing, spend me now

The long run is now, spend me now

You'll have nothing, spend me now

I said

Don't keep spending

Clap along if you feel like the government should spend

Don't keep spending

Clap along if you feel like the people know what to do

Don't keep spending clap along if you want the market to be set free

Don't keep spending

Clap along if you feel like the people know what to do

Spending, you spend me now

You'll have nothing, spend me now

The long run is now, you'll have nothing

Spend me now

I said

Don't keep spending

Clap along if you feel like the government should spend

Don't keep spending

Clap along if you feel like the people know what to do

Don't keep spending clap along if you want the market to be set free

Don't keep spending

Clap along if you feel like the people know what to do

Don't keep spending

Clap along if you feel like the government should spend

Don't keep spending

Clap along if you feel like the people know what to do

Don't keep spending clap along if you want the market to be set free

Don't keep spending

Clap along if you feel like the people know what to do

To 'Drive' by Incubus

Sometimes, I feel the fear of, GDP, decreasing
And I, I can't help but ask myself, how much I let the
Government take the wheel and steer

It's driven me before, and it seems to have a way,
Of making me employed
And lately, I'm beginning to feel effects, of saving my money

CHORUS: Whatever tomorrow brings don't matter,
Cause in the long run we're all dead
Whatever tomorrow brings don't matter, don't matter

So if we, decide to waver our, fiscal policy, ye-ah
We will, see a big decrease in, unemployment rates, ooooo

It's driven me before, animal spirits
I trust the government
And lately, I'm beginning to find that when the 'G' goes up we prosper

CHORUS

END

Billionaire

Em Vollrath

I want to repair the economy so freaking bad
Get back that job I used to have
Call Congress on the telephone
To raise spending
That's the only fiscal policy
Oh every time I close my eyes
John Maynard Keynes comes into sight
Yeahhhahh
Different ideas every night
Oh yeah I swear, you best be prepared.. for when the economy's repaired

Yeah Keynes is not like Hayek
He believes in spending
The Paradox of Thrift
And multiplying
I'll be using policy of J M- Keynes
And increase that AD curve with the multiplier
The Monetary Policy is very important
Need to increase spending to increase employment

Oh every time I close my eyes
John Maynard Keynes comes into sight
Different ideas every night
Oh yeah I swear, you best be prepared.. for when the economy's repaired
Ooooh oh. Oohhh oh.
When the economy's repaired
Ooooh oh. Oohh oh.

I want to repair the economy so freaking bad
Get back that job I used to have
Call Congress on the telephone
To raise spending
That's the only fiscal policy

Waddup Hayek?? Haha!

Oh every time I close my eyes
John Maynard Keynes comes into sight
Different idea every night
Oh yeah I swear, you best be prepared.. for when the economy's repaired
Oohh oh. Oohh oh.
When the economy's repaired
Oohh oh. Oohh oh.
I want to repair the economy
Sooooo freaking baad

"let it go"

the money keeps growing in our pockets tonight,
not a recession to be seen.
a kingdom of government spending,
and it looks like i'm the king.
Hay-ek is howling like a swirling storm outside
couldn't save my money;
heaven knows iiiiiid never-try.

don't let them save,
we all must spend,
play our part in thee economy
act in the now,
don't let them saveeeee....
we all must spendddd...

let it go, let it go
can't save our money anymore
let it go, let it go
turn away and slam the door
i don't care
what hayek's gonna say..
let the spending grow onnnnn
deficits never bothered me anyway

it's funny how some ti-ime
makes prices mul-ti-ply
and the ideas that once controlled us
can't get to us at all

it's time to see what we can do
to test the limits and break through
no right, no wrong, no spending for meeeee,
i'm free!

let it go, let it go
i am done with the animal spirits
let it go, let it go
yell it so hayek can hear it
here i stand
and here i'll stay
let the spending rage on.....

our money flurries through the air into the ground
our sticky wages spiral right to e-quil-i-brium

Part of Your World: GDP

Look at this money
Why aren't we spending?
Wouldn't you think that we should spend now?
Wouldn't you think we're failing?
Because of our actions

Look at these people
Who are unemployed
Aggregate demand must be increased
Looking around here you'd think
How can we fix this?

We've got problems and deep debts a plenty
We've got people just sitting around
You want change?
I know what to do
Come with me
Just listen
I want more

I wanna see the GDP soar
I wanna see, wanna see them spending
Implementing that...
What's that word again?
Fiscal policy!

Saving your money, you won't get too far
Have confidence
Forget the paradox of thrift
In the long run we're all...

Out of this trough
Wish I could see
Our GDP soar

Sarah Olsen
Meredith Kolb

Make it Grow - John Keynes Approach

to the sound of Let it Go from Frozen

All the stores are empty in the nation tonight

Not a purchase to be seen

A nation of Low GDP

And it looks everyone's panicking!

The banks are howling like a swirling storm inside

Everybody's saving, the animal spirits alive!

We must spend now, Keynes will be proud

Be the spender you always used to be

Government must act now

The GDP must grow!

Make it grow, Make it grow!

It will help unemployment go

Make it grow, Make it grow

It will help the recession go!

Government,

Please tax less

Federal Reserve,

Easy money supply is the way to go!

GDP Poem
Olivia Berry

Watch prices inflate
green jobs soaring and public debate
GDP down then add tariffs to the trade
the compression of time
finding the most effective ways

The outsourcing of process the reduction of land
the private sector selling to the master in command
the stories and situations of others and how it effects you
will breeds a new breed of seed for producers to sell soon

"Let it Grow"

(Let it Snow)

Oh the economy is in a recession

But Keynes, has a great idea

And since the GDP is low

Let it grow, let it grow, let it grow

Oh the government should start spending

To help the aggregate demand

The GDP is still low

Let it grow, let it grow, let it grow

Unemployment is starting to decrease

And people, are starting to feel relief

But the GDP is still low

Let it grow, let it grow, let it grow

When people start to get more jobs

They can buy more fancy things

Then GDP will start to rise

And then we will be alright

But expansion doesn't last forever
One day, the economy will reach its peak
And inflation rates will get too high
Don't let it grow, let it grow, let it grow

But Keynes has another great idea,
When inflation rates get too high
We need to start spending less
Then we will be alright

And expansion will start all over
And the government will need to spend more
And since the GDP is low
Let it grow, let it grow, let it grow

“Oh, Wouldn’t It Be Lovely” From *My Fair Lady*

Lots of money for me to spend

Lots of spending boosting the GDP

That demand will drive the economy

Oh, wouldn’t it be lovely?

Oh, so lovely sittin’ abso-bloomin’-lutely still

The economy would stay strong

With increased spending

Now wait a minute don’t overlook

Recessions will happen no matter what

So much spending won’t help us

Oh, that wouldn’t be so lovely

Not so lovely, Not so lovely, Not so lovely

All we need is to let the economy be

Supply will create its own demand

Reaching equilibrium

Now that would be lovely

Lots of deficit from government spending

Let the market support us

For prices, and wages are flexible

Oh, wouldn't that be lovely?

Oh, so lovely sittin' abso-bloomin'-lutely still

You can never predict people

Fro they have motivations and actions

If interest rates kept artificially lower

Prices soar and recession worse

We could avoid this with letting markets be

Oh wouldn't it be lovely

Lovely, lovely, lovely

Oh, wouldn't it be lovely

Lovely, Lovely, Lovely

Wouldn't it be lovely?

“All I Want for Macro is GDP”

I don't want a lot for macro
there is just one thing I need
I don't care about the money
underneath the economy

I just want GDP for my own
More than you could ever spend
Make my wish come true
All I want for Macro is GDP, yeah.

I don't want a lot for macro
there is just one thing I need
I don't care about the money
underneath the economy

I don't need to save my money
there upon the bank steps
Keynes will make me happy
With fiscal policy on Macro Day

I just want GDP for my own
More than you could ever spend
Make my wish come true
All I want for Macro is GDP, yeah.

Oh, I won't ask for much this year
I won't even wish for inflation
And I'm just gonna keep on waiting
Underneath the bank nation

Hayek like prices and wages

Nothing in life comes free

Let people spend their money

And leave the economy be

I just want GDP for my own
More than you could ever spend
Make my wish come true
All I want for Macro is GDP, yeah.
